HERE ARE THE ED LINES

Welcome to the latest issue of the ustoppable COMMODORE FORCE. By now you will have gathered that a sudden price-hike has been thrust upon you, and I'd like to take this opportunity to explain why, exactly, you're being asked to pay (a hardly wallet-busting) four pence more per issue.

It's simple really: free games! Although we've always had the policy of providing our readers with the very best cover-games available each issue, you will no doubt understand that the rights enabling us to feature games belonging to other companies on our Reel Action tapes costs us. A lot.

Fortunately, though, we have just so many dedicated readers that a meagre four pence-a-month each from you lot—an insubstantial sum individually—adds up to a tidy amount in total. Now, we could cynically cream off this extra revenue and claim it as profit, but the whole reasoning behind the increase was to enable us to pay more money... for substantially better games.

Take this month, for example. We're so confident that enough readers will jump for joy at the prospect of owning three of the very best C64 games ever produced, that we've forked-out for 'em in advance. Still, if you're unhappy about it here's your chamce to make your feelings known. All you need do is write to Lloyd Mangram and tell him, in 50 words or less, what you would've done with the 4p we've ruthlessly ripped-off you this issue. The best three (as judged by Lloyd) will receive a FREE years subscription to the mag — and if you're already a subscriber then you'll automatically be awarded a year's extension at no extra cost. In addition, disk users will be pleased

In addition, disk users will be pleased to discover that all Reel Action games are still available on disk (see the Reel Action pages for details)), and the price is to remain at just £1.499. Now is that a bargain or what? Next month's games are hardly going to be a let-down, either, with a couple of 90 percenters already lined up for inclusion... you'd not only have to be mad to miss it, you'd also have to be preetty sad to boot!

THE BEES KNEES

inging it's way to a Commodore near you soon is Bee 52, a new release from program veterans Code Masters. Set in the insect world (with no relation to the pop group), you get to control a bee on a quest to collect nectar - not only to support your hive, but in order to keep a honey-making firm in business. It looks set to be one of the finest cute-shoot 'em-ups in a long while, with gigantic spiders, slimey slugs and a host of other hostile creepy crawlies to encounter whilst delving into the odd flower to pick up the nectar. Bee 52 was a successful NES release, and looks set to repeat it's fame on the C64 (anything Nintendo can do. Commodore can...). From what we've witnessed so far, it looks not only graphically excellent (parallax scrolling by the screen-full), but plays mightily impressivly too. You'd be a tool to miss our review next month, so make sure you don't. Bee there or bee round.

THE GANG & THEIR GAMES

IAN OSBOURNE

Trust lan to swan off on his holidays without writing his bit for Who's Playing What (he's gone camping near Wigan if you're interested, which we dare say you aren't). Ah well, we've had a reterendum here at the office, and it has been generally agreed that if Ian were here, what he'd be playing most is, er, well, we're not exactly sure! One thing IS for certain, though, when he returns we'll all be playing the same game... Hide The Holiday Snaps!

THE END OF THE BUILDING THE BUI

Yol it's me again, Ben The Boffin with another selection of simply fabulous telephone tips just waiting for your call. With so many smashing in tricky to

games about at the moment, it's been tricky to decide on the four that should be up for nomination. After several hours of stern playtesting (what a carefree life I lead) the following four were selected. So pickup the phone and dial away. Calls cost no more than 10p and the winner will be featured in next months playing tips. Keep on reading, and remember to tune in to THE BIG BREAKFAST's MasterBlaster slot, every Monday and Thursday at 7.45am.

o Despite my somnambulistic leanings. I've only had a few throws on Ocean's excellent C64 Sleepwalker. Terrific though the games is, I played the Amiga incarnation to death (and must say this one compares very favourably). No the game that's grabbed my attention with both hands this ish has to be Spindizzy—a firm favourite when first released. I still love it just as much today. Let's hope you do

NEW ALTERNATIVES

ilm and TV tie-ins are not at all uncommon on any computer format, and the latest set to make '64 debuts are Suburban Commando and Alvin And The Chipmunks. Suburban Commando did the cinema rounds early last year, and although it was slated by the critics, crowds still attended due to the films leading star—wrestling legend Hulk Hogan. It cast The Hulkster as an alien who crash landed in the garden of an everyday American family (if there is such a thing) and followed Hulk causing havoc in the suburbs whilst fighting many of his grappling chums, all gifted with cameo roles. Will Suburban Commando find fame on the Commodore? Well, if Hulk can't find it, maybe Alvin, and his friends The Chipmunks can.

We know little as to what structure the game will take just yet, but being based on the popular cartoon show, it should turn out a treat. Perhaps it'll feature the 'munks high-pitched vocal cords — we can only wait and see. Expect full reviews of both Suburban Commando and Alvin And The Chipmunks as soon as they're released in forthcoming FORCES.

t's simple, it's addictive - It's Krackout! Yep, it's sideways on block-busting mayhem aplenty on your covertape this month. Here's a few tips to help you play.

Some bricks roll over when hit to reveal bonuses. The ball must hit this brick to receive the bonus.

- Glue, Ball sticks to bat. B - Bomb. Creates an

explosion, destroying adjacent blocks

S — Shield. Makes a barrier appear behind you. M - Missile. Gives you one

BALL

Prism Leisure

he evil Terry Ball has captured your spherical pals — Lover Ball, Eddy Ball, Glow Ball and No Ball. Armed with only a bubble gun, you must enter Terry Ball's domain and struggle through the 16 defence zones. You will find a pal to rescue at the end of every fourth area.

Each level will offer a constant barrage of obstacles — such as glowing ones that are electrified and will frazzle your ball on contact. Terry Ball has also populated these

zones with nasties including doughnuts, microwave ovens and roulette wheels. These are harmless when they initially appear, but become highly dangerous once they've started flashing. However,

don't despair — succeeding isn't as impossible as it sounds, thanks to the particularly useful Power Disks. If your ball picks one up he will receive either a piece of weaponry or a bonus of some kind. Weaponry is shown as a series of icons to the right of the screen. These are Turbo Boost, Horizontal Laser, Smart Missile, Bullet Spray (front and rear bubble gun), Electro Shield, Laser Spray (left and right lasers), Molecule Bomb (nullifies electrical obstacles), Super Brakes, Laser Cooling Unit and Rainbow Ripple Laser.

When you start the game a Power Disk will instantly appear on the screen. Pick this up for Turbo Boost. Now progress upwards through the first zone. If you let your Bubble Gun fire for too long it will overheat and you'll have to wait for it to cool down; also, every time you die you'll lose a piece of weaponry. As you progress through the levels, Faulty Disks will begin to appear, making movement even harder. Finally, on the 27th Power Disk you'll get the ultimate weapon — the Rainbow Ripple Laser...

adly, full price games seem few and far between for the '64. Just take a gander at the charts to see for yourself — budget

domination, big time. With several new releases being nothing but hot air, I awaited Sleepwalker with baited breath. Could it prove to be a fullpricer to rank along side many legendary titles of old? Much to my extreme delight. Sleepwalker is truly brilliant, the programmers deserve a hearty slap on the back, and no mistake

Why is it so startling? Sit

back, relax, and I'll begin... At a glance little Lee is an average healthy youngster. but every night while his fellow triends are safely tucked up in bed. Lee has a tendency to sleepwalk - heavily! Walking around at night completely oblivious to the surrounding world is more than a little risky, but fortunately for Lee, he has a very loyal dog. So loyal, in fact, that he's prepared to get chewed, fried, and beaten up, all to protect Lee from harm. This may sound quite barbaric (I can toresee animal rights activists assembling banners at this very moment) but guiding Lee around the multidirectionally-scrolling landscapes is the main ingredient from which tun is provided.

SMILES: That's right mate. It's good-bye, farewell, erm, so long...

JAMESY: Hang on though — isn't this Street Fighter 2? I don't think that would make a good sandwich filling. Neither would it's less-than-boniferous...

SMILES: Boniferous isn't a word

JAMESY: It is when you catch your leg in a door, Smiles, It's as thoroughly unpleasant as an afternoon eating a Terminator 2 side-salad.

SMILES: Salad is a good sandwich filling isn't it?

JAMESY: It certainty is mate!
Especially with a little of that yummy
Fainbow Islands dressing, It's
certainly MY number 15 — In fact, I
think I'll go get one now...

(Sounds of Jamesy leaving room)

SMILES: Wow, that's amusingsaladpunominal. I'm spellbound, almost Dizzy. What a great guy. I think I'll have a s Arnie 2.

(Muffled sound of talking from other room.)

JAMESY: Would you mind opening the door for me, mate? My hands are as full as a little dog after eating several large forests.

(Smiles goes to open door)

SMILES: Aargh, boniferous! I've caught me leg in the door mate...

JAMESY: ...and I've dropped my oh-so tasty snack. Doesn't life SUECK sometimes?

smiles: Don't warry '64 slinkers — things'll get better as Souness Heroquest's some more food.

(Cue canned laughter)

JAMESY: See you next month,

With over 1 60 coinop conversions available for the C64, we thought it prudent to separate this mega-feature across two issues. This months section is brought to you by JAMES 'CHANGE IN HIS POCKETS' PRICE, the letters A to L

US Gold

his isometric skateboarding game caused quite a stir in the arcades with it's simplistic (but enjoyable) gameplay and scintillating rock soundtrack. On the C64 though, the wheel-related madness is hampered by an all-too-easy difficulty level and a lack of variation.

Gameplay-wise, it involves little more than collecting cash strewn around the 3D playing area. Once enough is amassed you can visit one of four skate parks. located on the edge of town. When you've done this a few times and beaten the time limit (didn't I mention

and the number 74...

Encore

sets in.

ld it may be, but 11942 is still a prime example of the cliassic shoot-'em-up. There's none of your flashy (but useless) power-ups here; just emdless, frenetic blasting. Sadly unavailable thesse days you'd be particularly luicky to find a copy, and even line arcade machine has disappeared into obscrurity. Who knows, maybe it'll appear on a compilation.

t's predecessor may have given pleasure to the masses, but 1943 is every bit as horrific as the war it's subject time played host to. Dull sprites. appallingly short levels and sheer

mindless tedium helps the make a duffer you'll want to forget

I suppose you could trake solace from the fact that it's inspirational coirin-op was a little on the unremarkable side, but I that doesn't excuse faults in the parallax (i.e. islannds move as tast as clouds). I'm just off too jump up and down on the tappe that it's code is containeed. on, but I'll leave you within this message: don't buy it, it it sucks

Melbourne House

odgy collision detection and feeble gameplay make this monster-bashing game's title particularly apt. Losing the arcade original's two-

player mode cuts half the fun; having the rest converted so badly doesn't help either. Sadly, AAARGHI is a game for very patient and forgiving fire breathing monsters

CTION **US** Gold

his dull Spy Hunter variant does little to guicken the pulse and, having never seen the obscure coin-op, I can't comment on the accuracy of the conversion. I can

say the C64 version is particularly dire though, and doubt I'd line my cat's litter tray with It.

've got to admit that I didn't really like the arcade machine, and so I wasn't expecting much from the C64 conversion. How deluded I was! Either I didn't look close enough originally, or the trusty Commodore has excelled itself again... In terms of gameplay, it's VERY similar to Golden Axe, with fair graphics

and sonics, but it's the twoplayer mode in which Alien Storm shines. Running through horizontally-scrolling levels and shooting things is tremendous iun, and even the Operation Wall sub-level is praiseworthy.

I'll recommend it on the strength of the disk version, but tage owners beware - the multiload is like a hetty piece of fruit cake after granny's Sunday lunch (or something).

The Edge

lien Syndrome is a corking game even to th day. Stomping around the scrolling levels a rescuing hostages is compulsive fun; get a friend to join in and you've a monster of a two-player game. Both graphically and sonically excellent, you'd be hard pushed to find many conversions to rival

it - it's almost a perfect replica of the original.

The Hit Squad

onverting the graphical excellence that player such an integral part in it's arcade parents success was bound to be a tricky task, but nothing prepared me for this disaster. Diabolical graphics, mind numbing gameplay and insipid sound makes a mockery of the C64's abilities from it's SID chip to it's shift keys. Having seen the passable (enjoyable, even) action that

the Spectrum version had to offer, I'm particularly disappointed by this and I can guarantee you will be too. Avoid

LTERED The Hit Squad

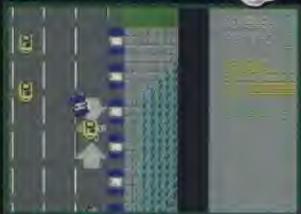

the coin-op wasn't exactly the best I've playe and the C64 version is marginally more dire because of: a — sluggish controls b — infuriati gameplay and c — both of the previous multipli by three. The horizontally scrolling gameplay is made slightly more enjoyable by the addition of a two-player option, but even this becomes tiresome after a while. Even the arcades novelty mutation sequences are missing, and the multiload's a pain in the backside. To summarise, it's just too beastly by half.

C-FORCE No.7 | JULY 1993

The Hit Squa

PB's multidirectional, criminal-bustin' gameplay turned a fair few heads on it's first release; even now, it rarely fails to impress. Controlling one certain Officer Bob, you're given a set amount of crooks to catch during an allocated time limit. This can be done by racing up to them, and turning on your siren. Once the days quota has been captured, it's just a simple trip back to the station for the next batch of orders. It's not that easy though, as missing crooks, running out of time and crashing your car all result in demerits. Get too many, and it's game over as Bob's fired from the force

Granted, the graphics are a little blocky and the soundtrack could do with a good boot up the speakers, but it's still an admirable conversion and a dam fine game

The Hit Squad

lock-busting wonder or mindless drudgery? I'd say it's somewhere in between, but the basic left right and (occasionally) fire gameplay leaves a lot to be desired at times.

For example, the ball you're trying to keep moving either moves way too fast or far too slow. This makes the game both infuriating and boring

— so why's it so addictive? Lots of people loved it (and still do) but it's definitely an all or-nothing game, and no amount of power-ups can hide the prehistoric design

The Hit Squad

adiands is a lot better than it's predecessor (namely Super Sprint) but it's ridiculous difficulty curve makes a mockery of the racing/blasting action. The tracks are displayed using a birds-eye view, and there's some great background graphics, but the thing is, it's so easy to beat your computer opponents at first, and too difficult after a while. The two-player option acts as a partial remedy; but don't they always?

It's at home the most on budget, where it's enjoyable (but limited) gameplay is both cheap and cheerful; something for a rainy day, perhaps?

MMANDO Capcom/Go!

winging around in the trees may not be everyone's ideal cup of tea, but Bionic Commando does it with style. With five levels of extending-arm madness to plough through. it's both tricky and enjoyable; there's also a superlative soundtrack accompanying the

On the negative side, the graphics are a trifle shoddy, and your character seems partial to falling through platforms every now and again. These are by no means terrible flaws; merely annoying as they delract from such a great concept. Also, the pace tends to be a little pedestrian at times but again, this doesn't ruin the game in the way you'd expect.

That bionic arm really is cool though Just think of the pints you could pinch with it.

Imageworks

an anyone remember Asteroids? Of course you can, but would you play it these days? That's why Blasteroids is such a perplexing game. It's a development on the aeons-old theme. that almost, but not quite, makes the grade. As a conversion, it's top notch, with nigh-on everything it's subject matter had to offer. Unfortunately, it didn't have that much to start with, and no amount of power-ups or two-player options can compensate for a phenomenal

US Gold

method's a little unfair. Nevertheless, it's still very

close to it's subject matter and an enjoyable

way to pass the time

ower-ups and large scrolling areas make this conversion of the little known coin-op a hit from the outset. Smart graphics and sound contribute equally to the well-paced action, and the clever level design make this a must buy for action and adventure fans. There's a steady difficulty curve

incorporated, meaning you get that little bit further every time you play, but occasionally, the control

lack of depth. If you liked the arcade machine it's a worthwhile purchase, but brace yourself for a two-day wonder and little more.

BOME

Encore

t's simple, bombdisposal gameplay made Bombjack worth the odd ten-pee in the arcades, but on the C64 a great deal of the charm seems to have disappeared. Clearing screen after screen of fizzino explosives soon becomes tedious; the occasionally frustrating nature of the gameplay doesn't warrant brownie points either

US Gold

he arcade version may have been novel and original, but the C64 version fails to duplicate this because of awful graphics and poor controls. At it's best with two players, Bonanza Bros is a split-screen robberarna where you control two robots attempting to outwit various security devices and steal valuable objects. It's a tricky business but, as I've already

said, it's let down by some armoving flaws. Not the best conversion ever - there are worse, though...

hoddy graphics and nonexistent gameplay make this disastrous conversion a game you'll wish you'd missed. As well as being horizontally scrolling action of the most awful kind, it's also puzzling

that the developers would make such a diabolical game out of a limited (and tedious) coin-op.

Hit Squad

ub and Bob's first computer outing is one of the C64's most classic arcade romps. Controlling one of two lovable (?1) dragons, you have to trap screen after screen of nasties by blowing bubbles at them and encapsulating them. After you've done that, there's only the matter of popping the bubble and weesel away they

It's simplistic platform action has to be played to be believed, and the two-player option is just manna from heaven. If you haven't got it yet, then now's the time to do so you'll have missed out if you

Encore

tight time limits. A classic

his novel racing game game succeeds in doing what others in this genre talled making a driving game drive (if you see what I mean). Colourful graphics and varied tracks add a great deal to playability; what's more, you get a real sense of achievement from beating the

CABAL

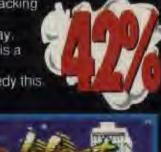

The Hit Squad

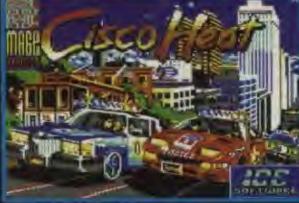

Ithough it lacks the simultaneous twoplayer option that added so much to the gameplay, this trenetic Op-Wolf variant is still one of the best shooting-gallery games ever. Clearing static screens of enemy forces is very addictive: further attractions include collectable weaponry and destructible

scenery. What's more, it's available on budget - and al £3.99, it's a steal

he Hit Squad

hile the Spectrum version of Chase HO is one of the best games Sir Clive Sinclair could ever have hoped for, the C64 incarnation is a joke — lacking speed, features and consequentially gameplay. Apprehending criminals is a dull affair and the dire graphics do little to remedy this. Sad, but true.

CISCO HEAT

Imageworks

race between police across San Francisco? Sounds like a poor plot for a poor producttypical contrived arcade drudgery, I thought (and expected)

As well as being undoubtably one of the worst games I've had to play while researching this feature, it's also the most awful, excuse of a racer

I've had the misfortune to play so far. Terrible graphics, mind numbingly bad sound and nonexistent gameplay help to make a game to give a nice, warm glow in your tummy - it you don't own it, that is...

Encore

oystick wagglers aren't my idea of a good time. I happen to be quite attached to my right arm, and abusing it in such a fashion doesn't strike me as being wise. Combat school is (quelle surprise) a game that requires lots of rapid joystick movement, and the occasional bit of skilful timing. It's true that when you disregard the shooting range sections, there's little different than the sports orientated (but ultimately similar) Track and Field or Hyper Sports. Even the militaristic theme is a little state and only really affects the graphics, but with a

nifty two player option and moderately fair difficulty curve, you'll find the genre has offered far worse before now

DOUBLE DRAGO Mastertronic Plus

ouble Dragoin is one of my all-time favourite arctade machines. It's ironic that the one game I'd appreciate being converted properly is one of the worst to soil the '64 to date. Tiny (and beadly drawn) sprites, the absence of major features, appallingly slow multiload; need I sgo on? The programmers should be Rogged to death with scented bootlacess, strung up on a tree with I banana skins and soaked in pineapple juice

the arcade mackhine was quite stunningly close to it's preedecessor, to the point, in fact. that you could say i it was the same basic code with alternative grasphics. Thankfully, the same cannot be said aboout the C64 conversions, as DD2 is far better thran it's (particularly dire) predecessor

The game's nothing remarkable designwise simply a multi-level beat-em-up with lots of people to hit and spread all over the horizontally scrolling play area. Sadly, most of the moves are redundant as you only need to hit most assailants once; after three or four levels you also begin to

G-LOC US Gold

It's a lot better than Afterburner, but G-Loc still has it's fair share of flaws. For a start, the graphics tend to be a little cluttered and it takes too long for your (supposedly hi-tech) plane to get a 'lock on' with an enemy. However, the main problem lies with the games tremendous lack of depth. In the arcades, the hydraulic cabinet and fantastic graphics captivated

anyone who played it. Sadly, you can't duplicate these features on a C64, and so any original charm is lost.

uriously both games in the superlative Gho sage are of the highest quality, but special ment has to go to this on account of it's age. As with it's sequel, the damsel rescuing nature of t plot certainly won't win it many awards, but the gameplay is of a high enough calibre to justifiably do so. Conclusion Never let an Alghan hound born your Flymo (or something)

his competent conversion of the unremarkable beat-em-up coin-op was originally licence by Elite, who were a trifle disappointed and didn't release it at full price. After appearing on a compilation, it eventually made it's way to the Encore budget label.

It's foremost feature is the size of the sprite they're large and, although not particularly well animated. serve their purpose well enough. Sadly, it gets boring too guickly although that's mainly due to the insipid original design.

GREEN BERET

Imagine

reen Beret's classic coin-op action is as enjoyable as you'd hope for, strangely, everything that the original had to offer is incorporated. Despite it's age; you'll

be hard pushed to find better - I recommend you scour market stalls and car boot sales with a view to finding it's horizontally scrolling excellence.

The Hit Squad ryzor is a multii-part shoot-rem-up that's remarkably close to the enjoyable coin-up.

It's beginning to look a little dated these days, but with horizontally scrooling levels, single-screem blasting and lots moore, there's still a lot to geet your teeth into.

his development on the Commando theme is by far the best you'll find this side of the arcades. Fantastic gameplay is complemented by delicious graphics and although lastability may be a long-term problem with solo play, it's with it's two-player option that Ikari Warriors makes it's grade.

Storming along the vertically-scrolling area, shooting enemies and stealing tanks - this game has to be played to be believed.

Storm

ollowing the success of Super Off-Road Racer. it was inevitable that there'd be a sequel. Without a doubt. Indy Heat is the best overhead racing game available on the C64, offering frantic racing action, a two-player option and a real need for strategy. Rather than just learing around the tracks (as you would in, say, Supersprint) you need to make pit-stops, the efficiency of these being directly influenced by the skill of your pit crew. These, of course, can be improved with winnings and careful purchases, but don't forget to improve the car

22 ROUND-UP

KLAX

The Hit Squad

fter Tetris, the amount of puzzle games rearing their (occasionally ugly) heads just had to be seen to be believed. Klax is one of the better ones, and assentially it involves manipulating blocks and arranging them in certain patterns as they drop. It's very simplistic, and good fun for a while but if (like me) you're not a massive puzzle enthusiast, then don't hesitate before knocking a good 30% off the overall percentage live given.

CUMO-FU MASTE

US Gold

he arcade machine has spawned many a derivative clone; this is particularly

puzzling when you think how dire it was!
Nevertheless, US Gold converted the basic beat'em-up action well, but the original's design makes for soon tedious action.

LAST DUEL OUS Gold

ike LED Storm (reviewed elsewhere on these pages), Last Duel is a conversion of an insipid coin-op involving car-like vehicles and a host of things to avoid and shoot. However, unlike the aforementioned, it's egg-smashingly mediocre. Feeble graphics and sound do little to add buoyancy to sound that should be

gameplay that should be sunk — if I bought this myself I think I'd have to sit in a corner for a few hours and whimper.

Lots.

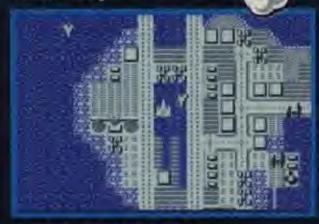

LAST MISSION

US Gold

arry had never really been pleased with the cheese and ham toastle he'd bought. When he'd left it on the side, he expected it to behave as snacks usually do, ie not move. He returned later to find it putting the finishing touches to what 'it' described as a flipping great computer game, man'.

Actually, this was a bit of a fib, as the multidirectional scrolling shoot-lem-up action was not of the finest quality. The graphics were pretty dodgy too — obviously, the ham content dimmed his creative talents.

Harry did what any person would do when confronted by a C64 programming sandwich. He fed it to the dog.

LED STORM

Kixx

ED Storm has a fantastic soundtrack, detailed graphics and excellent presentation. It's a vertically-scrolling racer where, as opposed to shooting things, you make your car jump on their heads. It's certainly unusual, but the only fault lies in the arcade originals insipild design.

That's not to say it's totally unplayable —there's at least a week or so of enjoyment in it — but sadly the conversion is a topnotch replica of a none-too-hot coin-op.

LEGEND OF

Imagine

t's old and more than a little crude-looking but Legend of Kage is great tun... for about half an hour. It's old, limited, derivative — and you won't be able to buy it these days. Lucky old you.

LINE OF FIRE

US Gold

nto-the-screen shoot-'em-ups in the shooting gallery style aren't really the sort of games the C64 excels at. When you consider that the arcamachine's foremost novelty (and quality) is the cabinet-mounted guns used to pick off targets, makes using a joystick a bit of a joke. Personal think it's a vastly over-rated genre, and

Line of Fire is a shockingly bad effort. Shooting poorlydefined sprites while uninteresting backgrounds scroll towards and past you isn't my idea of a good time.

All good things must come to an end of sorts, and it's with moistened eyes that I wave goodbye to this first instalment of (possibly) the biggest C64 round-up ever. Next month—the m's to the z's. You'l be a double aardvark milkshake (?!) to miss it you know...

hat kind of a person are you? According to several, stereotyped reports you're either a lazy couch potato, or an energy-thriving adrenalin-junkie. Apart from being most inaccurate, it does little to a potato's already-sheltered lifestyle. Imagine the scene; a small root vegetable, who works hard for a living, participates in a local 'It's A Knockout'

tournament. A few weeks later it discovers that humans have used its active lifestyle to describe a slovenly human! It's enough to make a potato commit suicide via saucepans and forks — now there's food for thought!

So to avoid being named at the expense of a potato, the right-on thing to do is take up a sport, and what easier way than to play Zeppelin's excellent. Sports compliation. With five games included it's definitely money-worthy, and what better way to unwind than lying on the couch with a bag of potato crisps playing darts.

In conjunction with the release (see review

In conjunction with the release (see review elsewhere this ish) Zeppelin have come up with the splendid idea of giving one fortuitous reader a brand new copy of Sports PLUS the entire Zeppelin back catalogue, That's over fifty games! Ten equally lucky entrants plucked from the bag will each get the Sports collection and a free potato! Okay, the potato isn't included (due to transportation and mold problems) but who needs those sad, suicidal vegetables anyway?

So what do you need to perform to stand a

So, what do you need to perform to stand a chance of winning? As with all things easy, this couldn't be simpler, just answer the following question:

Where are the 1996 Olympic Games being held?

- C) Isle Of Sheppey

no later then August 1st

This month, I've been under the impression that I was a 1970's disc jockey entertaining a wedding reception at a local village hall. There I was, spinning two paper plates on my desk and asking the stationary supboard for requests. 'Lets have everybody on the dance floor' I hallered — 'come on Grandad, even you'. It was a nightmare and nothing but! Just when I thought I'd recovered from

woke to find myself awoke to find myself carving medallions out my sandwich box.
What inexplicable force could have brought this on?
At first I thought Bernard
Cribbens was involved in some way, but then I realised — with so many tips to compile I'm suffering a nervous breakdown! Gees, talk about a weight off your shoulders.

ARNIE 2

Zeppelim

his sequel is a majjor let-down — a shame considering the addictive blasting of the first game.

Trudging through the ffirst level can result in a lot of life loss, so why botheer? Wouldn't it be much easier to go right into levvel two with no deaths? Well thanks to a graphicaal error (mistake or intentional, you decide) AAmie can stride into level two.

From the start, walk paast the buildings (avoiding the gun fire) and you'll coome to some lengths of barbed wire. Move to where the two lengths intertwine and position AAmie as close as possible. Waggle the joystick and / Am will sneakily step

through, into the end of the section where no baddles appear! Walk up, through the mine field, and diagonally right to reach the exit. Level Two awaits!

ARTURA

Prism

his isn't really a cheat, more of a freakish treat for the eyes. Press down shift lock and keep hold of diagonal down on the joystick (left or right). All of the baddles will stop but your man can still walk around. Walk off the screen this way and instead of going to the next screen the score

and energy will scramble. Now let go of the controls to end up on a completely different screen than expected.

Thanks to Craig Wolley for that strange bit of info

McDonaldland is

hardly taxing but there's plenty of secret lives to be found. So if it's proving a tad gristly on the teeth, pick out the bits with this guide to the first area.

Ronald's House.

TOWERING TREES

There are two cards to collect in this level and both can be found near the beginning with a bit of tree climbing. Later on, a series of springs and dozens of coins appear. Nab them all, as points make..., er, extra lives.

THE GARDEN

Toward the end is a tall mast with a single yellow block at the very top. Stand on the block and leap as far right as possible. You'll miss the finishing tape and be able to collect several hidden coins and a extra life.

ROMALDS HOU THE CLUBHOU CARDS MEEDE LIVES: 03

GOPHER GROVE

There's an extra life at the very start top left, just past the spider.

There's only one spring in this level so use if — it leads straight to the 'M' card.

Don't hastily jump to the right. There's only one sale way across, and that's a boat at the bottom of the screen.

LAZY LEAVES

Instead of snapping the finishing tape, jump over it to find a handy spring. Use it to be flung up to 8 extra lives ripe for the picking

L'ALLE LLICE

HIDDEN GLEN

There's an extra life at the very start.

Collect a block and throw it at the bear above. From this platform jump far left and you should just reach another branch.

Superjump to claim the floating life card.

CARNAGE

Zeppelin

arnage adds a big twist of lemon to all Supersprint-style race games. It's one of the best around and well deserved the plump 81% that it was awarded just a few months ago.

It's quite odd, but when competing in a two player game the yellow car is always able to overtake the others by driving through them! It can also stop in the road and block all other cars. To use this to your advantage, select a two player game and position the yellow car where it'll block off the computer drivers. Then, drive the pink one around to

win the race every time (be sure to avoid the road blockage though, the pink car will become stuck tool)

MOUNTAIN VIEW

From the start jump on the near platforms to reach the very top of the screen. Walk right until you see the inverting wheel. Instead of turning upside down jump up as high as possible to end up on top of the ceiling! Continue right, and with

careful timing you can reach the end of the level (still on the ceiling) and be able to drop down to collect 8 extra lives.

When you encounter any spring board platforms, grab a block and jump on. The extra weight will spring you a lot higher to reach unseen platforms.

Soll Cilling

So many of you write in with a specific game problem and as much as I'd like to I just don't have the time to send back answers. So this issue, the clinic has been expanded to cover lips for three of the most requested games

This months prize for the best tips goes to... dum dum dum dum... MEI Because I've done just about everything. Nah, only joking. The action replay will soon be joining David Clartikson from Hull for summer

Points to remember:

Talk to Denzil to get the rope. You can then drop it on the alligator to stop it biting.

Take all 30 coins to Daisy's cottage Try to get the coin that sits under the table before you flick the switch to rescue Daisy.

To finish off this extra big section A Orwin from Sheffield has decided to lend a helping hand to S M O'Brien who, back in issue 4, aired his problem concerning Wizard Willy. Personally. I've never even heard of the game but it's good to see fellow Commy comrades coming together in times of need

To defeat the end of level guardian position Willy on the top platform in front of the skull. As the top of the skull comes up to the platform level fire a three shot volley and jump the approaching fire bolts. Repeat this to destroy the beast. Sounds simple enough Mr O'Brien, so try and apply

he telephones were hat with many calls from issue fives tips phone line and here is the winner! Unfortunately, due to tight deadlines we went to press just before this could be included, so here are some subtle hints.

From the start collect the key and go onto the top platform to the right. Jump off this to create a small passage at the bottom of the screen through to the second key. Slide through the gap on your knees watching out for gargoyle fire.

On the level below there are two chains hanging over a lava pit. Hang on the bottom left chain to be impervious to the falling boulders later

Further on, there are three fire spewing gargoyles. Hang on to the bottom of the left chain and a secret passage will open at the end of the corridor.

Our review copy was a bit dodgy so I was unable to test this out but, apparently, to start with four lives instead of three hold left just before you

exercise. Just a thought...

Another cheat that has eluded me but has been assured to work is a level skip mode. T gain access to level two activate the closest gargoyle to the start and this should open a r route from where you first began. Try it, you might like it!

I like this part of the tips section. With it all wrappe up and ready for press I can just sit back, relax and let the waters of tranquillity wash over my toes. But then, just when the air is settled, a big explosion occurs and flings me off into an abyss of letters. So with a wave of the hand, a poker in the eye and a big greasy dollop of Brylcreem — I shall depart. ith our resident art-master Oli Frey away on his hol's, we were at a loss as to what to use for a poster. Then we discovered that Paper Tiger Books had an astonishing new volume all ready to hit the shelves, and our worries were over - the front cover of Ciruelo Cabral's The Book Of The Dragon would, we thought, make an excellent pull-out

Not satisfied with the poster, though, Paper Tiger insisted that we give FOUR lucky winners the chance of seeing the book for themselves, plus three of their other best-selling titles. TEN runners up will each receive Paper Tiger bookmarks. badges and posters!

So what do you have to do to be able to feast your eyes on Mr Cabral's dazzling designs? Simple just draw us a dragon! The four best pics we receive will be printed in the mag so please use colour where possible and, if the response is overwhelming, we may consider publishing our awn book of the dragon!

Send your entries to: Doesn't It Drag On! Competition, COMMODORE FORCE, Impact Magazines (UK) Ltd., Ludlow, Shropshire SY8 1JW. We're sorry, but only entrants who enclose a SAE will stand any chance of seeing their art-work again. The closing date is June 27, so any entries received later than that will go up in smoke ...

DAIS MOVE PLECTIFICS

Dear Lloyd,

Having just re-entered the '64 scene, I thought I'd write in and make a few observations. Firstly, I would like to point out that I've been a C64 user for a very long time now (my first new '64 was £300) and was in the first few issues of ZZAPI even as a demi wizard on The Adventure Helpline (my name was Steve Williams then).

What I wanted to mention was the subject of consoles, as it seems everyone I used to know on the '64 (3 or 4 years ago) went console crazy for a while. However, we should bear in mind that many people are coming back to their C64's (must be the shock of £45 a game).

Regarding the state of '64 software; one should not worry unduly, because as the recession lifts, more money will be available for more game development.

Also, onto a point about all the letters you receive saying 'where can you get such and such a game'. I would like to give a company a mention who specialise in both PD software and in buying or selling second hand originals. They are: Electric Boys Software, 16 Grovehill Rd, Redhill, Surrey RH1 6PJ. For information send a large SAE stating whether you are interested in PD or originals.

SA Williams, Horsham, West Sussex.

Oh the joys of quiet market towns in deepest Shropshire. Our biggest recession this year has been Steve's beard. Never mind Steve the goalee looks 'out' anyway.

64 ON TAP

Dear Lloyd

I have a serious problem! Whenever! bung your covertapes into my datasette they never load (actually, I don't think any of your covertapes have ever loaded). It could be my datasette but I've only had it four months. Sometimes when I'm loading, the tape just stops, and when I try to fast forward or rewind it doesn't respond. When I tap the C64 a bit it sometimes starts to work again. Oue questions.

1) I'm going to get a disk drive. Are Bubble Bobble, Rainbow Islands, Turbo Outrun and Shinobi on disk, and if so, where can I purchase them from?

Try the Forcefield Plaza. If it's available, they should be able to find it for you.

2) Can you please (x 1,000,000) put a review in your brill mag for Outrun Europa. Turrican, Strider and Turrican 2?

We only review games as and when they're released, though you're in luck with Outrun Europa, which came out on budget last month (see Issue Six). As for the others, if you want to obtain back issues through the Forcetield Plaza, the mags you require are ZZAP! 64, numbers 61, 57 and 70 respectively.

Please help me as I've had these problems since I was born

Dear Sir.

I've sent your completed survey questionnaire. I've filled it in on behalf of my son Joe (lage six), who has had his C64 for just over a year. He discovered your magazime four issues ago and saves all his pocket money to buy it each month.

He has answered all the questions honestly and I believe you couldn't hop for better answers. He is genuinely thrilled with your publication and I don't believe you could improve it as far he is concerned

The reason I write is to let you know just how much he loves COMMODORI FORCE and in particular the covenages. I don't believe the questionnaire answers show you just how much pleasure the magazine brings to Joe each month.

TEAM FOR HIRE

Dear Lloyd,

t am Peter of The Eighteam, you may or may not be aware that we are the authors of those popular games The Extricator and The Energem Enigma. Anyway, to the point of this letter. Prof Roberts has asked me to write to you and pass on a letter to your readers, I hope you will print it as he really does need help. So that's all from me, over to the man himself.

I am Professor Roberts, I see from your last

temptation of 14-bit technology (mainly due to the price of gares) and feel sad that such a great machine I being neglected by software companies and he public alike. I agree totally with Mr Denhar's letter, Issue Three; it's all a question of mony and survival in an increasingly corpelitive market. Unfortunately, can I see consies selling for a fiver at car. boor sales in thineat future, despite the current recession

Just looking trough recent issues at COMMODORE ORCE proves my point. What's happend to Ocean, System 3, US Gold etc? Whereas Iwas unusual for there not to to be several gams from such publishers in each ssue, now we'r lucky to get any. As I've already stated, a down to survival — the increasing populity of budget software for the C64 meant a deease in revenue and sales from full-price reases, whereas on the Amiga and ST their pro margins are such that this Isn't a great proem. I would guess that these companies havoledged allegiance to the 16bit machines, wire the real money is to be made, althougheving not looked at any Amiga or ST magazine scently, I could be wrong.
The biggest test, however, comes from the

consoles. They appear attractive, as they are relatively cheap but, as many parents with console-owning children have doubtlessly now discovered, the monopolies of Nintendo and Sega mean ridiculous prices for games. Airight, the graphics and sound are superior but, as has been said so many times, there's no substitute for playability - which is why with games like Microprose Soccer, Armalyte and The Last Ninja there's no beating the

I really hope I'm wrong, but the future of the C64 looks bleak. Rest assured one thing; I'll stick with it to the very end. Long live the

JM Hurroll, St Austell, Cornwall.

 My my, we are getting cynical, aren't we? Seriously, even though some software producers have turned their backs on the '64, there's still plenty of new software around (and in the pipeline), not to mention a back catalogue of incredible volume. The machine may have passed its heyday (arguably), but it's not ready to lie down just yet.

I'm confused!

Dear Lloyd, wish to introduce myself as Speck. I'm half Volcan, half Scottish (see my surname). Some of your more knowledgeable eaders may have heard of my uncle, twice removed at warp 7.9, Spock, Like my uncle, I have a fanaticism with accuracy so I've written this exigent letter.

In Issue Four I was extremely disappointed to find ERRORS!

H.A.T.E is not the only diagonal

shoot-em-up -what about the amazing Armalyte?

Secondly, the trade description act 1968. amended 1972, states:

It's illegal to describe goods or services incorrectly.

And what do you do, I'll tell you - the front cover said 'Every C64 Flight Sim reviewed and rated'. What about C64c and C128 ones though? I said I liked to be accurate. I was also shocked to see how many flight s(t)imulations you hadn't reviewed - Falcon Patrol, Falcon Patrol II, Acrojet. Advanced Tactical Fighter and First Strike. Don't tell me you couldn't write about First Strike, it was on Issue One! The chance of making two c*** u*s (first word being a male hen without the 'rel', the second word being up) is 1 in 56764.6874. which is about as likely as me being

Apart from all that whinging I'm pleased

OR NOT

No sheep jokes please. I was just wondering what's happening with the TBDD001 3.5' disk drive for the C64.

I've had my C64 for five years now and have been considering a disk drive but delayed buying one until I found out about the 3.5

I've been buying your mag since Issue Two now and chucked Commodore F**** out the window 'cos your mag is much better.

CHUM

Wot no PS's? That makes a refreshing change. In answer to your disk drive query -forget it! The system has been bugged from the start, hence the delay. When it eventually does arrive, it's more than likely to have such a limited distribution that decent software support is unlikely to amerge

OUT DATED

Let me start by saying that I find COMMODORE FORCE quite informative overall, and I find it to be the best magazine for C64 users. However, when will you all get your act together?
In the last issue of ZZAPI 64 you got the info

regarding loading the covertapes scrambled. Now in the April edition of COMMODORE FORCE you have done the same thing again. The games listed on the tapes are in the correct order but they are switched around on the tape covers.

However, the main problem is this. In the March Issue Chris, Miles and Ian all tested Dalek Attack. Now if you go to April's issue it would appear that everybody concerned with COMMODORE FORCE climbed into a Tardis and legged it back a whole year and didn't make it back. Open on page 66 and at the bottom of the page, on the right hand side, is a red blob which proudly tells us that the May issue hits the shelves on the 25th of March 1992! Does this mean a new international date line has been drawn up? Does If mean we all have to borrow a Tardis to get the. May edition? Just look at it — coming next month last year!

Please try and get yourselves more organised in future lads. It's a great mag overall, but these constant little foul ups tend to annoy us perfectionists

Get the Ed to give you a 50% pay increase because whatever you're earning can't possibly be enough.

Apologies for the odd little mistake, but remember - a lot of time and work goes into each issue of your fave Commodore mag. Despite checking, double-checking and triplechecking, occasional errors will pass unnoticed. I hope these are few enough not to

spoil your enjoyment.

FRODIGAL SON

Dear Lloyd & crew

I must confess that I strayed from the flock, but thanks to your magazine and WH Smiths I am now a born again C64 fan. I was distracted to the Sega Master System by the heavy advertising campaign of Sega. For several months I was fooled into paying £30 for several games which soon lost their appeal. Whilst walking through WH Smiths I was confronted by Issue Three of your magazine and I remembered the good old days of the C64, so I purchased it. I was not

Dear Lloyd

I would like to congratulate your whole team on the new COMMODORE FORCE. From cover to cover it's written in an interesting, informative way, covering all ranges of knowledge, without falling into the trap of treating people like idiots (i.e making out you're some weird beings from out of space).

It's sad to see so many 64's in small ads; however, this doesn't mean the death of the 64 but new owners. As it's software we're most concerned with, the market will still be there.

I recently got a seller to split what was in his advert and bought a colour printer and mouse for the price of a hand held game, something other readers may want to try.

When software houses produce games, why don't they put infinite lives in as an option, and why do they make many games so hard? It's understandable on arcade games as the more played, the more money spent. When you buy game it's a one-off payment, no matter how many times you restart. Obviously with the interest in cheats, I can't be alone in thinking

What are the advantages of Mini Office 2, over Mini Office? The price difference is hefty M Wald, Wokingham, Berks

Would you really want games to be easier? Look at it from this angle — arcade games need to be more instantly accessible otherwise people would play them once and

with the mag.

PS Don't you love lbrackets (eh?).

PSS I feel sorry for the S's, it's usually

the P's which get used more.

PSSS Aniseed isn't for the eyes, it improves nerve leviel increasing hand-eye co-ordination. So you should buy everyone else aniseed. Coincidentally, aniseed is the seed of anise, so why isn't it called aniseseed?

Right my old China, so you like to be accurate do you? Well let's have a bit of a pick through your letter, shall we?

1) Armalyte is NOT diagonally scrolling, it's as blatant a horizontaler as you'll find.

2) What about C128 Flight Sims? I don't believe we claimed to cover them.

3) First Strike (which, incidentally, appeared on Issue Two) is an

Afterburner-style shoot-'em-up, so should Afterburner have been included? If so, is G-LOC also a simulation? I don't think so, and the less said about ATF the better. As for Falcon Patrol, it's another left-to-right shooter, for crying out loud. Even Acrojet actually displays your aircraft as a sprite on screen, so is it a true simulation? We decided not.

4) Cockerel is spelt with an 'e' in the middle so put that in your Captains log and file it.

I think too much going where no man has gone before seems to be having a slightly deleterious (LMLWD) effect on your superior Vulcan intellect (if you are of Vulcan blood that is - I have my doubts).

disappointed, but now I am addicted to the game called Batty. I can't put it down. especially as I have infinite lives with my Action Replay cartrdge.

What I am trying to say is that the C64 is more fun and more cost-friendly to its users. I was a fool to stray, I will not stray

Stuart J Brown, Gidea Park,

not bother again. In the other hand, when you spend £12 one new computer game, you want something called lastability. Having completeda game, it loses a lot of its appeal - I suppose it's all down to personal attitude.

Onto your moreserious point, Mini Office only contains fourprograms, It's tape-based but if you're a newor inexperienced user, it should be a reasonable start. If you're a little more serious, youmight be well advised to tork out for MO2 - it's a comprehensive system available a either £15 cassette or £20 disk format.

It's nice to see omeone still looking at the 64 as a serious pice of equipment as well as a games machie. Good

THE NEXT GENERATION

Dear Lloyd. This is Jean Luc Picard speaking (well writing actually).

In my spare time I always play games on my C64 because it's far better than those computers I have on board the Enterprise. I must go where no-one has gone before, so I'm writing you this letter.

First of all I want to say your letter pages aren't getting boring (Issue Four last letter). Read the Wet Kipper in Issue Three, is that boring or what? I must say I feel sorry that you haven't got a megaturbo data-recorder. I have one here, and it loads all games in less than one second. That's still a long loading time. but I've got buckets full of patience, so I can wait that one second.

I love Reel Action Eight, side B. Keep putting games like that on, and you'll be

light-years ahead

The last thing I'm going to tell you is something about the Letter of the Month in Issue One. I've been on Magazinia and I know what happened with the ZZAPlers - they became FORCEers! I'm going to leave you now, but I'll write back soon (unless I've found the paradise, because then I won't write back!

Alexander 'Picard' Ensing, The Netherlands.

 Uh oh! We seem to be getting overrun by Trekkles this month — what with Mr Spock's nephew appearing elsewhere in these very pages. By the way, any readers intending to use their C64's for astronavigation purposes in the near future should be extremely careful. Extensive application software is required and at least a fundamental user knowledge. 1500-man starships are weighty pieces of equipment and a lot for the little C64 to handle. Give it plenty of rest between hyperspace jumps however. and you should be OK.

Dear Lloyd.

I'm afraid that this is a complaining letter, so here are a few complaints:

1) Why didn't you print my last letter? I was rather peed-off about that, as I lost the bet I had with my fish and I had to give him my bike

I hope you don't keep him in a bowl, as this could lead to spillage.

2) Why do you seem to be attempting to break the world record for the most c''p games you can get on two covertapes? On the average tape there's only one decent game at the most. There are too many text adventures as well. I like the odd bash (excuse the pun) but not everyone does

So if you like the adventures, why complain? Everyone has their preferences and we can't attempt to satisfy these every issue. As for the quality of Reel Action, let me put it this way — COMMODORE FORCE tapes are played by tens of thousands of readers who don't complain in the slightest. Doesn't this suggest we're doing something right?

3) Why is the subscription offer so rubbish? Almost everyone has a joystick, so they're not going to want another one - and the light gun's a dead loss as you can't buy any more games for them.

There are many readers perfectly happy with our subscription offer. As far as I can remember, you're the first to grumble. Doesn't this indicate something too?

4) Why did you give Trolls such a high mark? The demo on the cover tape was rubbish! The graphics are messy and washed out, you can't control how high you jump and the main sprite is

May I say that I totally disagree with you.

5) How about getting some PD demos on the covertape? Mc Gottifant was very good - how about some multi-part demos?

We will include PD from time to time. The problem is that most demos are disk-based, and extensive tape access is often more trouble than it's worth.

6) How come the COMMODORE FORCE reviewers raved about Dalek Attack, whilst the COMMODORE FORMAT reviewers hated it. Were you reviewing the same game?

I know who I'd believe.

That's it really. Sorry it's a long letter, but I had a lot to say

Dear Lloyd,

I'm not a very happy person. You put in your mag every month the day the next issue is coming out. I get up that morning and go 'oh yes, I'm going to buy COMMODORE FORCE today" but when I go to the shop they say it is not out yet. 'Come back in two days' they

say.
Two days later, II go back to the shop and there it is on the shelf, right in front of me.

I'm sorry I have ito complain (well not really) about the best mag in the world.

Now for some questions.

Nixx XL, £4.99 cussette, £7.99 disk

Shiver me timbers ye hearties, and other nauseating Treasure Island clichés. Pirates is back on the C64, but is it worth your pieces of eight or does it deserve the black spot? IAN 'SILVER LONG-JOHNS' OSBORNE sets sail...

t's great to see the Kixx XL label carried over to the good old C64 as ordinary, everyday cassette boxes can't cope with the complex game packaging. However, the

It was with much yo-ho-hoing and bottle-rumming that loaded up Pirates. All of a sudden, the thoughts of enjoying roaming the high seas and plundering wooden vessels laded - it's just so remarkably basic to behold. The text menus are placed on white backgrounds, with no scenery at all, a llaw also present during the sword fights! Going to battle against merchant ships doesn't add any excitement or depth; the opponents are either blind or full of compassion. Their shots are forever wide and visiting the towns is like riding a bicycle in a neverending circle, with many places offering exactly the same areas to explore Perhaps It's just my way of thinking, but countries do vary from each other, don't they? A historic setting plus a prehistoric design

adds up to one thing - an

ancient game.

extra box space for Pirates is pointless (the map supplied with the original is absent for a start) where were Kixx XL when the likes of Silent Service and Gunship were released?

Pirates is (according to the box) an 'Action-Adventure Simulation', a 'challenging combination of history, adventure and intrigue'. There's plenty of history here, but the adventure's pretty weak and after the first few plays intrigue goes right out of the port-hole.

On loading, you can start a new career, reload a saved game or embark on a historical expedition. Beggining a new career is the standard game, outlining the adventures of a pirate captain from his first expedition to retirement. A number of historical eras are available and you can also pick a specific nautical skill such as navigation, fencing, gunnery, medicine or wit & charm, Impressive, eh? Well, no - despite the extensive list of options the game itself is too shallow to sink a canoe, let alone a Spanish Galleon.

Pieces Of Hate...

Much of the game is spent sailing from port to port buying and selling, like one of those dud trading games from the early eighties but, being pirates, you get to plunder other vessels. When a ship is sighted there's the option (via the usual tedious menus) to engage in battle, accessing an appallingly bland combat screen where two tiny ships plod around firing cannons at each other. After firing off a broadside, you have to wait while the guns reload - however, the programmers don't seem to realise that a seventeenth-century sailing vessel had TWO sets of cannons, one along each side. When the port guns are fired, do the starboard ones unload in sympathy?

However thinly you spread your troops and guns, it has no effect on the game. Your ships behave as one vessel for cargo purposes and entire gun loads can be transfered at a moment's notice! Also, only one ship can be used in a scrap, however many are in the fleet. A bit of strategy role-playing wouldn't go amiss, such as assigning crew and cargo and developing the officer's nautical skills. Alas, this element is almost completely glossed over. Hand-to-hand fighting is just as bad - everyone on board disappears, except for you and the opposing captain who fight it out with swords. The 'action' is abysmal; two bland, featureless seamen wobbling over a plain white background.

Perhaps the biggest problem is the complete lack of focus. You can be captured by an enemy vessel, eventually being traded by your former comrades, marooned and later rescued, but you can never, ever die. There's no set amount of money to aim for either, and with no objectives to fulfil, the game's just one

Pirates is a very boring strategy game with too many badly-presented menus and too little variation. Perhaps the programmers should've stuck to the old naval traditions of rum, scurvy

and the lash. Or maybe not...

As well as being too sickeningly sweet for words. Tam and Rit are tiny little fames in a strange and hostile land. Their poor mom's been kidnapped by an evil demon and imprisoned in the mysterious 'Maboots' tower and the pixie-like pair are her only hope. To help in their quest, a village elder bestows upon them the Rods of Sheesanomo: powerful, mystic artefacts, hidden for centuries, surrounded by folklore and quite painful if you're biffed on the head with one and that's what Tam and Rit do. Stopping only to take the rainbow shoes from their pop, they make their way to the tower.

On entering the strange construction, the two are confronted by a room consisting of several platforms accessed by ladders. Atop these walkways roam several strange animals. Suddenly, one such creature lunges for the cutesome twosome. Rit ducks out of the way just in time, as Tam brings his rod down heavily on the nastie's head. Stunned for a moment, the evil one is unable to move, so thinking quickly Tam picks

him up with the rod and smashes him against the floor. Once, twice, and on the third bash the poor beastie vanishes out of existence. In his place lies a shiny metal object. At that moment another creature comes lurching towards young Tam who. in his haste to escape, trips over the metal thing. There's a resounding explosion and two more baddies cease to be problem. It's then that our loveable heroes realise another 39 tricky screens stand between them and their beloved mother's freedom

Every eight screens, a big guardian pops up to test the reactions and rodding ability of the fairies to the limit. These include tearful crocodiles

smiley whales, a droopy elephant - all vicious, but so sweet it's a shame to hit

In addition to the baddies, each level contains loads of swaying flowers. Collect all of these and you enter the extra game' - for a short period, every baddy drops a letter when killed. Collect all the letters to make up the word extra and a rather nice fairy pops up to give you an additional life.

Inspired by the classic Bubble Bobble. Rodland is refreshingly playable and jolly outing, especially w two players. Co-operating to dispose of baddies then racing hell for leather to get the bonuses fir is a delight to behold. Then there's the charming graphics, particularly the main characters, they'i

 The degree of cuteness packed into Rodland Is absolutely sickening; fluffy squirrels, rotund elephants, etc. but it's so compulsive to play, you'll risk the chance of splattering your monitor with stomach ejections anyday. Bletting the furry felons and collecting the muchous objects is easy to get to grips with, it's also good to see a twoplayer mode included, an essential option in games of this type. It's hardly a prime candidate for any lastability trophies, but there's that little something that makes it so inviting, what ever time of day. And at this price, why worry?

The skull and crossbones design's a familiar one. Death, poison and pirates a warning sign used to deter the inquisitive. CHRIS 'DOMESTOS' HAYWARD throws up over board.

hat influenced the stupid names that Pirates awarded themselves? In the case of Captain Hook It's selfexplanatory but with titles such as Caplain Pugwash and Long John Silver, you wonder what the blazes they got up to at a weekend. A large majority had an infatuation with beards -Bluebeard, Blackbeard, Red. Yellow, Pink and Greenbeard. Whether they actually dyed their facial hair is a mystery — fearing a bloke with fluorescent chin tufts is hard to picture — but it must have worked, considering the amount of goods they plundered. Skull And Crossoones is a vain attempt to recreate days on the high seas. when drinking rum, eating maggot roden biscuits and walking around on planks was a pirates daily routine. Fighting and stealing was also a popular pastime, and it was this lifestyle that brought the due of One Eye and Red Dog into the world of pillaging and 'yo-ho-hoing' Not disheartened by names resembling a Cantonese real, the pair set off in search of adventure. It was not long before they heard rumours of a hoard of rold, hidden by an evil sorgerer and, without stopping to compare

cultasses, they set off across eight levels of pirate-infested land

Similar to many beat-em-ups, you control one either One Eye or Red Dog in their search for hidden treasure. The basic walk-right-and-hack style is enhanced — slightly — by a few ladders to climb and ropes to slide down, although every area is a set scrolling route, so no different paths can be taken. Instead, only by killing all of the enemy pirates that appear can you scroll to the next screen. Several sword-lighting techniques can be used on the 'sea-dogs' although pressing fire will usually suffice. Health can be restored thanks to chicken legs that are scattered around. and bags of treasure can be uncovered by swiping special pirate squares, that occasionally tunnish the ground.

Irate Pirates

Although there's a two-player mode it isn't simultaneous, so don't gear up for any Double Dragon-style brawls. Disappointed? There's more to come I'm afraid, and one particular flaw has to be mentioned. Because every baddie has to be slain before progressing, you can be dueling five people and receiving multiple hits from some far off bottle-thrower. Should you turn tail and run, however, you can end up stranded on a screen with no way of going back So that's a choice of either losing lives or forever wandering round an enemy-bare screen. Participating in the duels is very unsatisfying: the opposition turn into powdery blemishes and vanish like smoke when dying, which is appropriate for a sci-li movie, but not an 18th-Century pirate yarn. The sprites are cartoonish.

 Gerald had always wanted to be a pirate; their inarticulate and often violent mannerisms had stways appealed to the rebellious side of his middle-class upbringing. Of course, it irritated the living daylights out of his parents - they where often known to say 'for God's sake man, you're fifty-two and a corporate lawyer', Nevertheless, it was an ocean life that he craved and nothing could deter him from his dream of buxom maidens and strapping sailors. Especially the ones with beards - but then again, he'd always had strange tastes in women... Now, if I had to recommend an alternative to him, Skull and Crossbones wouldn't be the one I'd choose. For a start, it's a computer game and can't recreate several key elements (such as the facial hair). Secondly, It's quite I astonishingly poor. Sad, but true.

but the animation breaks no boundaries whatsnever. Jolly Roger' tunes and effects are well used and the surrounding scenery is neat, but several areas look startling familiar, with only minor graphical changes. Getting involved is instinctive, simple fun, yet the shapeless fights and scantiness of depth only stir up feelings of claustrophobia. Skull and Crossbones is a historic setting transformed into an historic, dated game with few laughs to be had.

One you'll borrow off a mate and end

and perilous spikes pitting pervious problems for

America's lavourite sixties family, the oddball Addams', made the transition to the big screen a couple of years back. MILES 'FESTER(ING)' **GUTTERY** tries to avoid using words like kooky, spooky, etc. Sadly, he fails.

hat a disaster! The Addams family are to be evicted from their ancestral mansion by money-grabbing lawyers, In a heroic demonstration of lighting spirit, the kooky ones have all gone into hiding in and around the house. All, except Gemez.

To beat the eviction order he's gotta round up his yellow-bellied relations and present a model picture of family unity to the authorities. 'Surely it's not that simple' I hear you cry, and by thunder it isn't. You see the Addams abode is alive with nasty creatures, devious traps

 If a company are going to lash out on a film license, you'd expect the plot to be slightly familiar to the siliver-screen version, but as well as being so very much like Addams Family has nothing in common with it's movie counterpart. Finding the family members is literally impossible because of the relentless obstacles that need avoiding. Every screen is illed with barely-leasible leats that need at least ten attempts to get past. However, the graphics are exquisite, with detailed backgrounds and flowing aniimation - if only they could be compled with faultiess gameplay...

Every element iss just so blatantly old; where are the diays of new ideas and innovation? It's fair too easy to revemp an age-old formula and just patch up the seams with colour graphics.

Well it doesn't tool a tyrannical cynic lilike me, and here's the mark to confirm IL

our paternal protagonist. Armed with two running speeds and an arsenal of daring leaps, the sharpsuited Spaniard needs his wits about him to avoid getting pickled, pulped or perforated by the evil denizens lurking within his home.

Some nasties can be jumped on, either killing or temporarily disabling them, although many are invulnerable. In such situations Gomez's only hope is to dodge them.

The Mansion contains many doors, most of which are locked at first. In order for Gomez to access the murky depths of his home, colourcoded keys must be located. Careful exploration. inside and out, is the only way our hero will find all the findables, open all the openables, and ultimately reunite his family. To add to his troubles, the various characters are a less than trusting bunch and, when found, set Gomez a task to prove he's not an impostor. This takes you into a sub-game where the Brylcreemed buccaneer must survive for one minute in particularly dangerous torture chamber.

Despite not having seen the film, I can't imagine the game follows it all that closely. Thoughts of sitting in a cinema for two hours watching a

Life with the Addams would be easy, if only the lightbulbs weren't so difficult to change. man leaping over beach balls and repealedly getting skewered by hi spikes hardly fills me with excitent but that's pretty much the game in entirety. Graphics are quite nice throughout but gameplay is hopelessly frustrating. Most jump

require ridiculous pin-point accura and many end in tragedy time and t again. Chez Addams is a big place inde spanning a massive 240 screens, but

Gomez's six lives seem very meagre considering the infuriating difficulty level. The compounded by the fact masties are rejuvena once you've left a screen results in a lack of enjoyment, frustration, swearing and violent hurling of joysticks. To top things off perfectly horrendous multiload means you re-load the entire game upon dying — a case of too lew continues spoiling the already ropey broth.

Adding a few tangents to the action would t improved things. As it is, the repetitive, mindbendingly tricky play simply fails to inspire anything other than burbling rumbles in the stomach. These slowly grow until loud crashe indicate advanced states of nausea have been reached. It's then the

unsuspecting player retires to a padded room to suck ping-pong balls and ponder the meaning of an existence where such a tortuous game is played for pleasure.

eople often think physical education in schools is 'for the good of the pupils'. In actuality, I've always considered it an hour or so's worth of council-sponsored terrorism. Standing with sweaty armpits in a washed-out exercise kit lacks style; also, it's

person, and the subsequent showers can be

usually in the altogether unfashionable setting of a grubby gymnasium or tatty playing field littered with various animal droppings. Even worse, is that your bigger peers often take it upon themselves to foul, injure and occasionally mutilate your frail fraught during the onset of puberty. Strangely, some people enjoy participating in this curious

self-abuse; but if you prefer computer games, perhaps Zeppelin's Sports compilation can he you work off a few pounds

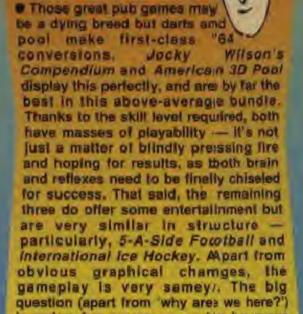

Here's a promising start in the form of Jock Wilson's Compendium of Darls, Essentially darts simulation (whatever that may be), it's a fairly innovative mix of joystick skill and moderately enjoyable sub-games (hence the 'compendium' in the title). In-game control is a simple case of steadying your swaying on-scr hand, with a quick jab of the fire button sendir your dart flying towards the board. This may sound strange, but it works well in practice two-player mode also makes Jocky a fair mul

player game for your money.

Continuing with the 'pub' theme (and making) my intro seem less and less appropriate) is trexcellent American 2D Pool. Played against computer or a friend, the table is viewed from above during the shot set-up, and from a 3D angle during the actual move. Also, there's th option to play billiards instead, and the addition

is value for money - or to be more

specific, if there is any. Well II reckon it's

worth the asking price, because none of the five are as bad as to be avoided. Hey, with the best two having a definite pub theme, you can't go wrongl

JOCKY WILSON'S DARTS

spin and power meters makes the action more skill-orientated than other games of this genre. Graphical touches also help lift it above it's competitors; sadly, there's a limited amount of balls during the Pool game (only three of each colour and the black) but this isn't too much of a problem.

Unfortunately, the quality begins to take a nose-dive with the unremarkable intermediation. Flue-a-Star It's by far the worst this collection has to offer, and it's hombly unrewarding gameplay (even during it's two-player mode) offers little deserving brownie points. For a start, awitching between players is nighten impossible; when you do manage, it's odds on that the opponent you're trying to catch is over the green hills and far away. The trauma is increased when you realise every player moves at the same speed, regardless as to whether they're running with the ball or not. This means the gameplay's a simple task of running from one end of the pitch to the

other and making a shot, before the opposing team do exactly the same. Oh, and shots seem to only go in from a certain diagonal; try anything else, and you'll fall dismally. Where's the skill in that?

On a (thankfully) more tuneful note, there's international fice Hockey. Perhaps it's most noteworthy aspect is it's awfully similar to international Five-a-Side, and yet isn't quite so bad. Once you've got the hang of your player's inertia, it's actually a fun little game to waste some time with. Unfortunately, as with it's sister game, design flaws are all too apparent. The ice-hockey angle isn't fully exploited and the odd amusing touches begin to lose their appeal after a while, but you'll not feel too bad about playing it...
Finally, Fantastic Soccer isn't exactly

what it's namesake suggests; back in the real world it's more of a poor-man's Microprose Soccer Still, the limited overhead view and shoddy graphics do have a certain charm—

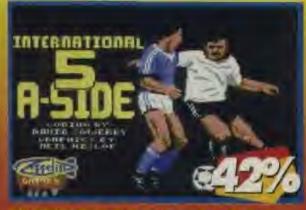

it's also a lot better than this compilation's other football offering. With a handful of teams to choose from, it's with the two player mode that Soccer comes into it's own. Beating a friend is an enjoyable moment; right Chris?

Sports is an above-average compilation. If you don't have any of the titles included, at £2.19 a game on tape and £2.99 on disk, it's a bit of a bargain. Try it and see.

CHRIS 'FRUSTRATED' **HAYWARD** is desperately trying to talk to his dream babe at the moment. Amazingly enough, after plucking up the courage to ask for a date, he made an awful mistake and ended up in a restaurant with Final Fight instead...

hen Mike Haggar was elected as Mayor of Metro City, he expected an easy life - a few meetings, cups of coffee, weekly holidays etc. So when a gang of unscrupulous villains kidnapped his daughter, he was most put out. The Mad Gear Gang' were renowned for their horrific crimes, and the more Mike wondered about his daughter's safety, the more he wanted to punch some mouths. Then, by sheer coincidence. Mike remembered one small insignificant event — he used to be a champion street fighter! Okay, so he'd aged over the last fifty years and sprouted an enormous beer-gut along with an inherited fungus-like disease, but he was still fast with his hands. Alright, for the record, he couldn't even tie his shoelaces in less than an hour, but Mike knew that he could beat the Mad Gears and rescue his beloved child. In his position, he couldn't possibly fail! He knew the chief of police, military personnel. Judith Charmers; hell, he'd even seen the President! (on TV that is, but he wasn't letting on). It was here that Mr Haggar made a critical error. Instead of consulting these important, power-laden people, he decided to call up a mate to go give the Mad

plight Final

Right, that's the plot over with, let's get on with the slating that this particularly dire game deserves. Final Fight's tancy introduction hides a dark side. and this nightmare vision comes to life in a writhing cake of worms and cucumber (bit of imaginative wording there) — the terrible

playability.

After selecting a single or two-player game and choosing one of three fighters (Mike, Cody or Guy) the first location is visited - and what a tarnished event it is. Beat-'em-ups are fun because they're so easy to get into. Final Fight is plain easy; so much so, you'll probably finish it first time. The moves available are shallow and unresponsive, the animation appalling. The sprites have some truly absurd limbs - hips bend at 90°, legs fold back on themselves disgracefull Completing each section is an intensifying pain as endless waves of nonchalant baddies wander on to get repeatedly knocked down by a stupid looking move. The two player mode hardly saves it from being utterly insipid, as many characters look so similar, it's easy to end up flattening your mate! It takes several seconds for a hit to register; a multitude of kicks don't seem to connect at all, and yet the receiver flies backward with torso

oddly misshapen. Sadly, Final Fight is a game with a serious lack of redeeming features, and my final mark reflects this. Your money will be better

spent elsewhere

 Lord have mercy if this isn't one of the most unplayable games we've seen in a while. The graphics are utterly terrible from beginning to end, and with playability seemingly absent from the programmers itinerary the result is quite painful to behold. Having looked high and low through this sad game,

I've enjoyed. It's arcade parent relied on huge sprites and thumping FX - in contrast, the C64 conversion combines stomach-churning squeiches with the most unresponsive controls

I'm unable to point out a single aspect

I've ever come across, leaving a game that's, frankly, a nightmare to play.

Somebody once said the pen is mightier than the sword. 'Yes, but only if you stab them in the eye with it, then run away' said popular philosopher JAMES 'YELLOW-BELLY' PRICE, waving his Biro menacingly...

o my mind, the best beat 'em up the C64 has ever produced is the utterly splendiferous IK+. More recent efforts (such as the disappointing Streetlighter 2) have neither the charm, graphical excellence or playability they even lack the pounding, oriental soundtrack (or equivalent).

Fist Fighter (according to the manual) is the only game to include Twelve Standard Combat Moves', 'Five Professional Fist Fighters', 'Three

Fight Locations' and a partridge in

It had to happen. Street Fighter 2's popularity has given rise to a seriously duff game. It's a crying shame that products are lobbed on the bandwagon without an ounce of substance between them, and Fist Fighter's cash-in attempt is a sad effort that chokes on it's own vomit. Perhaps the faults lie in the characters, or lack of them. With only five fighters to select and the only difference between these being one special move the prospects of a daunting challenge hardly spring to mind. It's laughable that a tournament hasn't even beem included, so you can lorget any special fighters to meet at the end as in Street Fighter 2. Graphics are brown, bland and banal and game play is just as stallned. This is one piece of software to turn a blind eye to - ithink smart

a pear tree. Oops, that one slipped in but you get the point, don't you? It goes on for a while, and resembles a Conservative Party manifesto in terms of hot air content. I suggest that the person responsible for this collection of nasty stuff be taken outside and beaten around the head with a mouldy dishcloth. It's a blatant attempt to make a metaphorical silk purse out of a sow's earbelieve me, Fist Fighter is awful.

fist full of dollops

There's certainly enough options to help you select the misery; changing skill levels and choosing one of three possible locations are just two of the (quietly counts) six options on offer. The presentation is quite natty too, with a respectable title screen and interesting pre-match introduction

All I can say about the game is 'oh dear'. It's obviously trying to cash in on the beat-'em-up. frenzy following the success of Streetlighter 2. although I can confidently say it's five times as bad. For a start, the controls are slow and unresponsive (not to mention badly laid out) but this doesn't become a problem too often, as once you've knocked down your opponent you return to your respective side of screen. As a direct result of this, most of the moves are essentially redundant though that's probably for the best, having viewed the animation.

Obviously, each fighter has their own individual special move. From a skittle roll to a whirlwind kick (incidentally, it's just like Ryu's in SF2) they're every bit as insipid as the normal moves, only they deplete more energy. The only aspect of the game that's even remotely praiseworthy is the end-of-

C-FORCE No.7 | JULY 1993

Consoles may have the considerable might of trend holding their metaphorical hands at the moment, but one thing they an't beat is the phenomenal history of the CO4. There's a veritable plethora of classic games from days gone by; bearing this in mind, we decided a considerably large feature was in order. Starting with the distant year of 1985 (and advancing to 1986 and beyond in subsequent issues) I (James) will be telling you about some of the best CO4 software and memorable events that came to light throughout the ages. Also, you'll find information on whether the games discussed can still be obtained, the sort of mark they received in their time and how they raite in these enlightened dayss. Researching this: feature wasn't as easy as I'd initially imagineed; for a start, our software collection and other archives only goo back as far as June 19835. I didn't want to begin with 1986, as there're so mnany classic titles worthy of (a mention before that datee, I'd be a fool to disregardd them. So, this month I'll bee detailing just over half a year, but rest assured thatt later instalments will I be (more

1985

he Gulf War was a mere gleam in the eye of an up-and-coming tyrant; Margaret Thatcher was Prime Minister (being a tyrant already) and I was aged a particularly youthful eleven. The C64 market was beginning to boom; software houses and programmers alike realised it's potential, and were grasping the opportunities it offered. Firebird certainly did with their conversion of the classic BBC Micro game, Elite. It was a space trading and exploration affair, with wireframe graphics, innovative control method and mind-bending addictivness. Essentially, it required you to fly between planets, purchasing and selling objects with a view to making huge profits. Initially, this was pretty much impossible, but after a few successful trades you could begin to deal in more lucrative lines. This is where the game really began to unfold; you'd ask yourself do I risk a lot by selling slaves (and make a killing along the way) or play safe by dealing in computers?". Also, during flight sequences, you'd find yourself attacked by murderous space pirates. Dispatching these resulted in a moderate bounty being awarded - in fact, you could decide to leave trading behind and make a living this way! The freedom available was out of this world, and with hundreds of planets to visit and ship addons to improve your standing... it was so engrossing, you could lose yourself for hours.

Many people questioned the competence of the conversion; believe me when I say that despite a slight reduction in speed, it was every bit as good as the original and a true classic.

US Gold's Spy Hunter has been duplicated incessantly by games developers for many years now, and being 'father' to a genre, set a good example. The vertically-scrolling shoot-'em-up action was vehicle-related, with a mixture of car and speedboat sections both requiring a steady joystick hand. Novelty presented it's head in the form of four power-ups, used to dispatch various

assailants, including a particularly nasty helicopter. Not everything in your path was out blood though — the game actively encouraged thoughtful play by subtracting points for every innocent civilian killed. Not that it stopped people...

Eilte got more than just an 88% rating for the Airwolf game (based loosely on the series of the same name) — the TV coverage it received on Central News almost guaranteed them a tidy profit. The game itself was a difficult, multidirectional-scrolling shoot-and-save-'em-u (phew!). The challenge it offered was rather admirable; however, you needed the patience saint to be a successful pilot. Nevertheless, it was better than it's weak Spectrum counterpart, and the percentages awarded reflected this.

Tricky, addictive and yet as old as thills — Airwolf's certainly worth a loo

Strange Happenings...

A news item appeared in ZZAPI 64, Issue One. It read as follows...

I was intrigued by the scenario in the new Commodore game. Jack Attack, reviewed in this issue. It leatures a guy called Jack going around getting pleasure out of squashing peoples heads. So what's the plan?

Denton Designs spoiled the C64-owning fraternity with their superlative strategy game, Shadowfire (released by Beyond). Although it's been surpassed by Julian Gollop's more recent Laser Squad and Lords of Chaos, it still ranks as one of the best thought-provoking games every written.

Taking your six characters (known as Enigma Team) in hand, you had to storm a highly-defended complex with a view to capturing the evil General Zoff. Control was accessed through an easy-to-use icon system — undoubtedly one of the best ever offered on the '64 — and although initially bewildering, it worked like a dream.

Staying with the stategy genre, PSS's Theatre Europe was widely regarded as the best wargame released at the time. Perhaps the games reviewers liked the idea of starting nuclear wars; this, among other thirgs, was an option during play. Comprehensiveit was, instantly accessible—no way. For thosewilling to take the time, Theatre was as goodas the year could offer; it also compares favouably to offerings during subsequent years...

Out of several race games Pole Position and Pitstop 2 came out on top. Viewed from behind, you'd have a limited amount of

time to drive your callike a maniac and beat other competitors. Pitstop! was universally accepted as the better of the ho; it's split-screen racing action was an innovaion for the time, and was greeted with open-ams and twitching joystick hands. Pole Positionwas a conversion of the arcade classic — although unfortunately, it started to age when finally reased.

• Beer, beer, we want more beer. All the lads are cheering, get the... rounds in?

Pjamarama spawned a sequel in the form of Everyone's a Wally. This second game in the Wally Week trilogy (there were actually four of them in the end) involved wandering around a hazard-filled playing area, solving puzzles and avoiding assorted nasties. However, certain tasks could only be completed by switching between four available characters.

It's mixture of platform and arcade adventure made Everyone's an enjoyable game to play. Even though it failed to receive rave reviews, it still attracted a cult following and was an admirable effort by it's publisher, Microgen.

International Basketball by Commodore bounced it's way onto the C64 scene, much to the delight of sports fans at the time. Although basically a revamp of their equally-adorable International Soccer, it scored highly with reviewers, receiving a typical 92% for it's excellence. Likewise, Imagine's World Series Baseball was widely regarded as one hell of a rendition of the predominantly American sport. As well as being enjoyable to play, it had a lot to offer in terms of presentation and general glitz. It was also a game I wasted a good few weeks on — and to think I could have been out in the sun playing the real thing. Would that have been as much fun though? I doubt It...

UK Gold's classic Dropzone made a phenomenal impression upon the industry at the time. Although it borrowed heavily from the likes of Defender, it was so slick in it's execution and playable to such extremes that it received a mindmelting typical percentage of 95. Not many shoot-

Down at Fractal Rock...?

Rescue on Fractalus is worth a mention simply because of it's graphics — they were some of the first on the C64 (and some of the last!) to be generated by using 'fractals'. I've no doubt you programmers out there will know what they are, but I'll risk lite and limb by trying to (roughly) explain.

Fractals are everywhere, Every cell, every living or dead organism, is (when reduced to their most simplistic level) able to be explained (and reconstructed) by numbers. These numbers can be mimicked using a computer to create random, 'realistic' images. Obviously, the C64 can't cope with the mathematics that the super-powerful PC's can, and so the end result is usually a little more simplistic (as with Plescue). Anyway, I've read a feature on it before now, so I know what I mean — they had pictures of terms and the like that had been generated on-screen using fractals. So, if I'm wrong, blame that article (wherever it was)

As for Hescue — It was OK for it's time, but appears limited newadays. Receiving a typical 31%, he recommend intor curio value, but little size.

'em-ups can profess to have received that high a mark; *Dropzone* firmly established itself above all others.

 No matter how hard we tried, we couldn't smash the TV screen. Oh well.

The ultimate game?

Ultimate where too godly by half on the Spectrum. On the C64, they seemed to be equally holy with the release of the fantastic Entombed. An arcade adventure with a strange viewpoint, it kept people from their sleep, food and pet-feeding activities for days on end. Unfortunately, two of Ultimate's other games (released through Firebird) tailed to make a similar impression. Sabre Wulf and Underwurlde were both conversions of Spectrum classics; sadly, by the time they arrived on the C64, gaming standards had Improved. Again, both being arcade adventures, they found themselves banished into the pit of mediocrity by arriving too late and offering too little. The general opinion at the time was that Ultimate shoud have given them a 'face-lift' - which is pretty much as First Star/Monolith did with he sequel to Boulderdash. Take one of the most original and addictive pieces of software ever, create a series of new levels and what do you get? Rockord's Riot was just as much fun as it's predecessor - however, you can tool some people some of the time, but you can't just (essentially) re-release a game without it being noticed. Receiving a typical 82%, it was commented upon that different levels don't necessarily make a gane a sequel — and rightly 501

o Cheap,

bargain —
Kikstart 2 had it
all to offer. Still
to this day it
raises a cheer.

Kikstart came as a bilof a surprise from budget house Mastertronic. At a horizontally-scrolling race game, it scored fev points for originality, but as a split-screen, two-payer bike-romp it amassed much acclaimfor innovation. With several tracks to negotiate, it was as simple to play as you could hope or — and for a mere £1.99, was one of the bitter bargains 1985 had to offer.

Way of the Exploding Fist is (arguably) the best C64 beat-'em-up ever, bar the more recent IK+. It's publisher (Melbourne House) gave the public excellent animation, screaming sound and — most importantly — fantastic fighting gameplay. In two-player mode Fist could really be enjoyed to it's full, and the sixteen moves could be utilised with maximum, bone-crunching effect. It's solo mode was by no means easy or badly implemented; far from it. It's just this sort of game is much more enjoyable played against a friend, and Fist happily catered for this.

The Electronic Pencil Company (famous for

Zoids, among others) took the icon-driven adventure approach and converted Fredrick Forsyth's The Fourth Protocol to the Commodore 64. The result was one of the best thought-orientated games available; still to this day, it can't fail to impress. Relating the game content would require more space than I care to give — suffice to say it's a classic piece of software that compares favourably with recent efforts.

Wagglemania

However, while Imagine's Hyper Sports is one of the best sports-related games ever released, the genre is basically as limited as ever. Smashing the living daylights out of your joystick was fun for a while, but in all too short a time you began to think 'why?'. However, it's frenetic gameplay wasn't all that bad, although, like others of it's type, it's a member of an over-rated game-style.

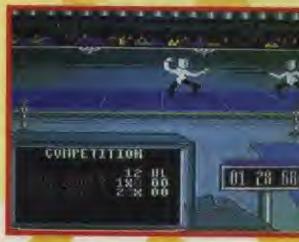

Summer Games from Epyx was in a similar mould. Luckily, the programmers tried to stay away from the usual frantic joystick movement approach, favouring a more thoughtful, skilful method. This worked fairly well; a typical mark of the time was 97%, although it's aged sufficiently

On the beach.

US Gold's Beach Head 2 was, as well as being an advance over it's predecessor, a darn fine game. Built up of four different subsections, it was different in the way that you could control either the good guys or the bad guys! This added considerable lastability to it's already strong playability base — although undoubtedly, it's strongest point was that two players could take either side, and fight until the bitter end Don't underestimate it after seeing the screenshots though — it moves a great deal better than it looks here.

enjoyable sub-game. If you managed to beat your opponent, you could cannibalise their bodies for useful, unbroken equipment, thus increasing your power and abilities. The assorted levels of robot meant that diving straight in for the big boys meant certain death; with a little tact and diplomacy though, it was possible to become

strongest points; taking control of a lowly robot,

you had to explore various levels and engage

other robots in combat. However, rather than blasting the living daylights out of them, you could

to loose a few points. Also, the cassette multiload was a real hindrance - I'd go as far as to say you often spent more time loading than you did playing the assorted events. Luckily, the variation between levels made for enjoyable action (for disk owners, at least) but personally, I prefered it's sequel, Winter Games.

Despite the cold and wet, winter sports are supposedly fun. I don't think so...

Again, this was a game that avoided the traditional, joystick-punishing control method and opted for a favourable system of skill and timing. The loading problems were (yet again) all-too apparent, but the levels were of such a high quality that you couldn't feel too bad about time wasted

In contrast, Ocean's Frankle Goes to Hollywood was almost faultless. Everything most people would want from a computer game was present in it's fantastically-coded gameplay. With enjoyable shoot-'em-uip and puzzle sub-games, coupled with a compullsive arcade adventure... forget the licence with the controversial band, as it

Finders Keepers was, like Kikstart 2, a £1.99 game that presented one hell of a bargain. What it lacked in, say, graphic and sonic appeal was more than made up for by the addictivity of the arcade-adventuring. Disregarding the plot is all too easy; like many products of the time, it's distinct lack of serviceable plot is almost cringeworthy. Still, helping the Magic Knight (as your hero was known) in his quest through mazes and over platforms was a quality affair that more than compensated for any shortcomings.

Monty on the Run was Peter Harrap's second mole-related game, and out of the four released, many felt this the best of the lot. Another arcade adventure, this barraged the player with a brilliant Rob Hubbard soundtrack and addictive gameplay. Original touches included a section where you were required to drive a Sinclair C5 (remember them?) and Monty's athletic leap (supposedly learnt in the prison gymnasium, during his detainment at Her Majesty's Pleasure).

While on the subject of originality. Microsphere's Skooldaze was a particularly novel approach to the phenomenon known as the computer game. To categorise it would to be call it a school simulation - and I don't think that's fair. It did require you to attend lessons, lunchtimes and playtimes, but was so much fun because of novel interaction between pupils and teachers and it's crisp, colourful two-dimensional graphics. It was much better than the real thing as well - for a start, you didn't have lousy Home Economics teachers grunting monosyllable cooking suggestions. What a great game

 Skooldaze is remarkably similar to Grange Hill. Blackboard scribbles, bangers and mash, but where's Gripper

o, having read all that, you're probably wondering how you could get your hands on these games. Sadly, I'd say most (if not all) of the games included in this issue's instalment have been deleted for many a year. However, have a quick look around at market stalls and car boot sales - you never know, you might just find that elusive original...

To show you just how well the classics of yester-year fare against recent offerts, where to obtain them (if possible) as well as a few choice comments, we constructed this table. Basically, it goes as follows:

Game Name - Publisher - Typical Mark of it's time — Force Factor (how we'd rate it these days) -Availability, For Availability, we've given an estimate of 'purchasability' (new word there) out of ten, with seven to ten being available in the shops and three to six being obtainable through mail order, the occasional store and car boot sales. Finally, one to three is for those really hard-to-find classics.

doubt you'll remember the controversy surrounding the book written by the tumous lemale singer/actress/all round bad girl, MADONNA! The book contains several moughly stones, illustrated by the queen of pop and her finends (it's not that good either ... er, apparently—Chris). Some dudes digitised the pictures onto the PC, and they we somehow reached the C64 in the form of a graphical slide show by the Dutch (who else) group, FACES. Although the picture quality is rather low (a 5 metre distance is advised by the programmers) you'll just be able to recognise Madonna.

Coding and graphics-wise this has low standards (even lower moral standards) but the DYCP FACES logo during the intro is respectable enough, and musically there's a computerised version of 'Under The Bridge' by the Red Hot Chilli Peppers. Hardly fitting, a bit on the slow side, but still an accurate and pleasing conversion.

Maddona Sex Slitro is a lunny joke. It's nice to see the C64 included in the hype, but the graphics (what a demo's all about!) are too bad to make it

ontroversy not only accompanied Madonna's book but went hand-in-hand with FOCUS's last demo. Nobody was best pleased with the offensive text it contained and owing to the bad publicity they've rectified the situation by including hardly any text whatsoever in this follow up.

The intro begins with a weird logo and animated characters zooming in and out, setting the scene for the first section. This teatures some dot animation and a tune which whisks you off down memory lane.

With a nice, professional looking loader, you're lead into the second part — Swinging Owl. Well, there is an owl, but on my computer it certainly didn't swing! Below the owl "FC 93" signs can be rotated, zoomed and flipped via the joystick — quite awkward and really rather boring.

On to part three — Flincredible. It features two FLI pictures, one from Robocop and one from Darkman. Personally I think they could have been drawn as normal pictures. Robocop

a nice (if repetitive) tune and the swapping between both pictures, this has nothing to offer. The next section looks like it would be

offer. The next section looks like it would be old news in a demo some years ago and TDJ, a member of FOCUS, told me that this was actually made a while back, but was thought too nice to be wasted. The 'plasma' is joystick controlled, and you can make some pretty funny effects with it. A nice touch is the small keyboard below displaying the notes corresponding to the music being played.

The best part is entitled Housed Heads featuring two halfs of a head with a woman dancing in the centre. The screen scrolls up. down, left and right; sadly, the woman isn't animated. The music is a rewritten version of 'Deek's Infinity' and even though the original version is better, this is great.

FOCUS' slogan is "Style is never out of Fashion." It couldn't be more appropriate — If only they'd just implement it in their products...

Oxyron

hat an active bunch of computer freaks the OXYROIN lot are! I mean, if you look up 'active' in the dictionary, you'll be referred to the word OXYRON — that's how active they are! This deemo was released just to show that it's possible to improve parts of Coma Light B. They reckon they're the most industrious group around, and you'd have a hard time proving them wrong.

The intro features a house-like tune with a Fantasia 3 logo being built up then faded out,

leaving the screen flashing very odd indeed. The second part features a plotscroll, built up from 640 dots and updated each frame but. as they admit themselves. these scrollers are boring without a special effect. The effect used

here is a line-vektor (with hidden lines) in the lower part of the screen and calculated in real-time. Sadly enough, these do little to save this part from being boring. Techy code, maybe, but no design at all.

What follows isn't much botter, the recent

What follows isn't much better, the reason being that the demo was rushed out in time for Coma Light 8 but wasn't good enough to be included (well, that's their excuse). You get to see some transforming pixel-vektors built up from dots, instead of lines or planes. An interesting fact that's worth a mention is that the music was recorded live at a party in Aars/Sweden by Pri of OXYRON, and I must admit it's a very good tune! Then comes FLI Fullscreen Once Framed Plasma. Again, it sounds technical and is hard to code, so it's a pity it's not that hot to look at.

All mathematical lovers will enjoy the following

display, it's a fractal, and a very fast one at that! You see a big full-screen plasma, and a smaller one in the upper left part of the screen. The only glitch is that the programmer has used his own fractal formula, a simplified version of very complex ones. It works, kinda, and at least the audio support is good.

After a small rasterbar interlude comes the ultimate plot extravaganza — 16.358 plots! (I smell a wet kipper though). It looks amazing you like a whole lot of lines scrolling through each other), but as for the rest — 2 scrollers and a logo — it's a bit of a mess. With crazy characters, a very standard logo and music sounding like a conversion from AAA (Awful Audible Attack). To put the dampners on things even more, a completely boring bob-scroller appears, looking very much like a dots-scroller, only with enlarged dots.

Next up is a Disk-filler which is basically a

Next up is a Disk-filler which is basically a whole lot of rubbish, especially the logo — it's the ugliest I've ever seen! Worst thing is, it's the last part (but maybe that's for the best).

Fantasia 3 is what they call it, some stages were too bad to put in a real commercial demo, only featuring some complex code and the odd tune. Nothing too be proud of.

PASTAND PRESENT

And now, it's time for a COMMODORE FORCE exclusive!

Mega Industries

MEGA INDUSTRIES is one seriously good company (although I would say that 'cos I'm the founder and co-founder of it!). We put together a startling C-FORCE PD compilation with products that have competed against demos like Dutch Breeze and Wet Dreams 2. Somehow we never got to complete it as everyone went off to work on bigger projects, so this is a preview of a compilation to come that will shake the PD scene upside down!

EMI'S FAULT

This was originally at the end of our Back To The Roots demo which was never finished either. It gained third place at the SILICON LTD. party, just after BLACKMAIL's Dutch Breeze. The stage contains an upward scroller — nothing fancy.

S***HOUSE

A weird name for a weird experience. Coded by Ghostrider (like everything else in this collection), it features the worlds first real FMFA. Sinnie came up with a complicated animation, but since we in MEGA only give out previews, even that FMFA hasn't been totally used. Two different animations spring up, one with jigsaw-circles (much like in London Beat's video-clip, which we reckon they stole from us!) and some rotating sunbeams, both timed to the fab house-like music by Jereon Tel (in a quadruple speed player, if I'm right!). Point is, those seemingly separate animations aren't actually separate. It's all done in one very complex full-screen animation, of only four frames. Still, it's a worthy part, featuring yet another brilliant design-invention by MEGA. You'll be seeing more of this (and better) in future projects!

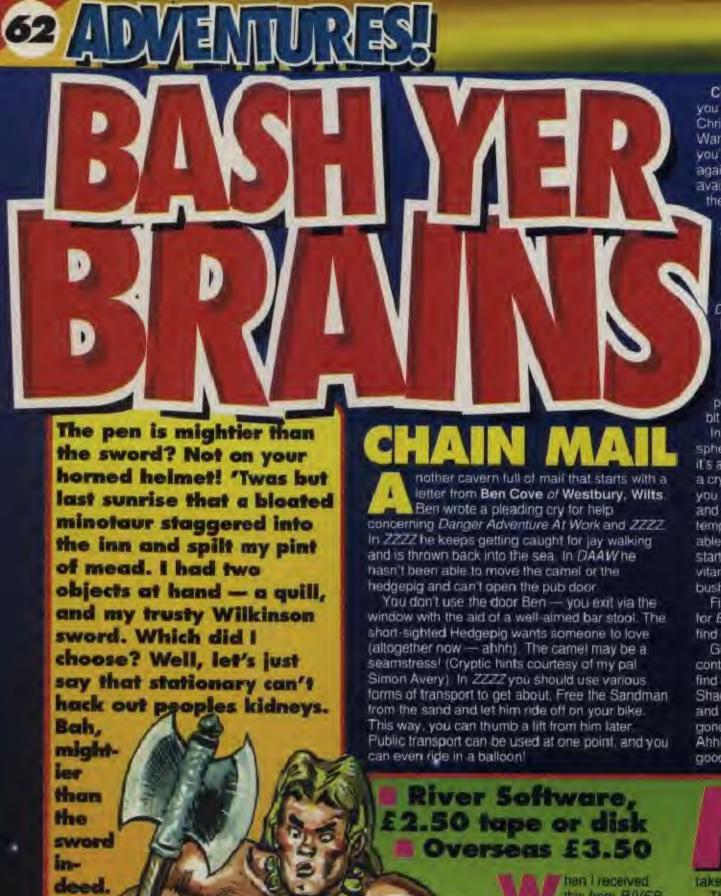

This is not all of Past And Present, but the other five parts aren't really PD-productions but several sub-levels. There's even a sneaky preview ALTER DEVELOPMENTS (yep, the ones producing Lemmings) forthcoming History Of The World. In addition to this there's even two birthday demos for me. They might be okay to review, but they feature graphics from Troddlers and we're not sure whether we've got that assignment yet (by the time you read this, we hopefully will).

DUTCH WINDMILL

Totally made at an earlier SILICON party this has a preview of FMFA — Flexible Mathematical F(something) Animations, something our graphicer Sinnie was experimenting with at the time. It consists of a rotating dartboard with a familiar face (to C-FORCE readers that is) and an overlaying scroller. Again, it was never really completed, so don't expect anything special. After saying that though, it's still impressive for something made at a party — even the calculations were executed without the help of a calculator!

A small, but interesting, note concerns the fabulous Geir Tjelta music. It was produced in a double speed player which can generate some very funky sounds.

That's all for this month, and with any luck (and if there's any justice) I'll have more of this PD kinda thing for you next month. Until then, have a banana!

this from AIVER SOFTWARE was impressed. Games by Jack Lockerby. ably assisted by his son-in-law Roger have always been a delight to play. All 20-odd adventures. that have come from Jack's prolific pen have been excellent Mines Of Lithiad is no exception! Jack has a special talent for setting just the right amount of atmosphere and manages to pack each adventure with devious puzzles without seeming to repeat himself which, considering the amount crammed in. s no mean feat. Let's

EXITINE NOTE

was speaking to a friend the other day who was moaning about a coded message he couldn't solve. He was on the verge of chucking it down the north facing fissure of my cave in frustration. I don't know if many of you, upon coming across some sort of code, get the same reaction and give up. My advice is the same as with mazes (see last issue) apply some simple logic and you'll start to enjoy them. These days, more and more programmers are including coded messages in their adventures, so perhaps the following advice may help

The more usual type of code is a simple substitution of letters, for example, ZOPOX=DELTA. There is sometimes an added twist in that, once decoded, it must be read backwards to make sense. If it's written in strange runes or symbols, the player will usually find a strong decoding clue elsewhere in the game.

The first thing to do is make a copy of the message on a place of paper. Use double line spacing — this way any substituted letters can be placed beneath each coded one. Examine the message carefully and always begin by checking which letter is repeated. It's a fact that the letter E' is used most in the English language, so if a letter keeps cropping up, try to substitute it with an E' lalso look out for any words of lifteen letters as this could

well indicate the word 'Congratulations'. If there's an eleven letter word followed by a two letter one, this may well mean Combination is - so keep an eye open. Similarly, a four letter word (not a rude one) at the start with no repeated letters could be Dear - especially if it's coded. I've even come across To whom it may concern. which is also quite easy to spot.

To show how easy decoding can be look at

this sentence: Boon popped free canon did boom boom roar'. Take the repeated letters in each word and it simply translates as open door". Along similar lines is 'Go outstrip Pete even now we excel Lovel Lawson'. Take the last letter from each word to get. 'Open well'

I had a tough time with Hollywood Hi-Jinx. A plaque read 'Levy, Regan, Lebling — Sate Company, Upper Sandusky, Ohio, 1936. By the time I'd finished, a dictionary could've been compiled with the words I'd come up with. Then, it finally hit me! Levy, Rega, Lebling were the only ones needed. Levy started with L for left and had four letters, so that was Left 4. Regan, in the same way, indicted Right 5 and Lebling meant Left 7. So. be warned - sometimes you can think a code is far more complex than it really is

I hope this will help remove the mystery surrounding codes; you may even begin to

That's all the advice for this month so TATTY TRUMPETS FLUFF ANYONE!

and a lot of exploration. Right from the start the puzzles are well thought out, enjoyable and intriguing. How, for inistance, do you get water. to the dehydrated main?

Nice touches regularly appear giving a teeling of authenticity. Patiencre also has its rewards - it often pays to hang around certain locations in order to gain something to your advantage.

Deep underground, you'll have endless amounts of fun figuring out windthes, turn-tables and barges fascinaling problems for the most hardy adventurer. Solve therm, and you'll feel a real sense of achievement. Personally, I enjoyed the original touches. One knapsackk in particular was the most unusual object I've ever come across! It truly wet a jaded appetite.

Written with the aid of The Quill, it's a textonly adventure and runs very smoothly. The parser is very friendly - I hardly ever got stuck trying to find the correct input, and even when I did, examining things usually provided the required clue.

If you've never played a RIVER adventure before you're really in for a treat - go on, spoil

it's well worth sending for a RIVER SOFTWARE catalogue, as Jack has promised 20% price discounts for those who mention COMMODORE FORCE when ordering two or more games. You can't say fairer than that!
